

FENTANYL

DRUG INFORMATION FACT SHEET

50X

STRONGER THAN
HEROINE¹

100X

STRONGER THAN
MORPHINE¹

Street Names For Fentanyl¹

- Apache
- Dance Fever
- Friend
- Goodfellas
- Jackpot
- Murder 8
- Tango & Cash

What Is Fentanyl?

Fentanyl is a synthetic opioid that is 50-100 times stronger than morphine. Pharmaceutical fentanyl was developed for pain management & treatment of cancer patients.¹

What Is Illicit Fentanyl?

Illicit fentanyl is distributed through illegal drug markets for its heroin-like effect. It is commonly mixed with drugs and made into pills that are made to resemble other prescription opioids.¹

What Is Rainbow Fentanyl?

Rainbow fentanyl is fentanyl pills and powder that come in a variety of bright colors, shapes, and sizes. These drugs are brightly colored in order to be more attractive to the youth but can be deadly.²

SIGNS OF OVERDOSE

You could save a life from overdose by recognizing the signs!¹

- Small & constricted pupils
- Falling asleep
- loss of consciousness
- Slow, shallow breathing
- Choking or gurgling sounds
- Limp body
- Pale, blue, or cold skin

LIFESAVING NALOXONE

REVERSE OPIOID OVERDOSE

Naloxone rapidly reverses an opioid overdose, when given in time. If you or someone you know is at increased risk for opioid overdose, you should carry naloxone and keep it at home.³

WHAT SCHOOLS CAN DO TO HELP!

- Create a safe environment for students. ¹
- Implement evidence-based prevention programs to educate students and their parents about the dangers of drug use. ¹
- Mitigate risk factors that can make students vulnerable to engaging in dangerous behavior. ¹
- Be prepared if an opioid overdose occurs on school grounds by installing a Naloxbox. ¹
- Support students in recovery and students whose family members are suffering from addiction. ¹

SIGNS OF OVERDOSE

Recognize The Signs. SAVE A Life. ²

- Small & constricted pupils
- Falling asleep
- loss of consciousness
- Slow, shallow breathing
- Choking or gurgling sounds
- Limp body
- Pale, blue, or cold skin

NALOXBOX LIFESAVING NALOXONE

The NaloxBox gives the public easy access to a first-aid kit with naloxone, CPR masks, and educational materials for those responding to an opioid overdose. Naloxone rapidly reverses an opioid overdose, when given in time. ³

RAINBOW FENTANYL

A Dangerous New Drug Trend

WHAT IS RAINBOW FENTANYL?

“Rainbow fentanyl—fentanyl pills and powder that come in a variety of bright colors, shapes, and sizes—is a deliberate effort by drug traffickers to drive addiction amongst kids and young adults,” (DEA Administrator Anne Milgram, 2022)

WHAT FORMS DOES RAINBOW FENTANYL COME IN?

Rainbow Fentanyl comes in a variety of forms including pills, powder, and blocks that resemble sidewalk chalk. Every color, shape, and size of fentanyl should be considered extremely dangerous (DEA, 2022)

FENTANYL IS DANGEROUS!

Fentanyl is a synthetic opioid. It is 50 times more potent than heroin and 100 times more potent than morphine. As little as 2 milligrams of fentanyl, which is equal to 10-15 grains of table salt, is considered a lethal dose (DEA, 2022).

WHAT CAN I DO TO HELP?

Educate yourself and others on the dangers of fentanyl and rainbow fentanyl. If you encounter fentanyl in any form, do not handle it and call 911 immediately (DEA, 2022).
